**TO WHOM IT MAY CONCERN**

I am contented to recommend Mr. Adarsh Batham, an applicant for the Master's Program at your esteemed University. As an Assistant Professor (Sr. G) of the Mechanical Engineering Department at SRM Institute of Science and Technology and also being Adarsh's Faculty Advisor, I got the chance to observe him personally apart from the curriculum for four years. I have taught him Fluid Power Control in his sixth semester and guided him in other core subjects like Manufacturing Technology and Engineering Graphics. From my observations, I conclude that he is attentive and always possesses a positive attitude towards academics.

Adarsh has always shown a keen interest in practical aided learning techniques. For his Major project, he chose the significantly complex topic in Tribology where he published a researcher paper along with his guide and peers, the paper titled, "Investigating the tribological behaviour of macro-textured surfaces generated by milling under intermittent lubrication flow".

Moreover, Adarsh's involvement in Manufacturing Technology Laboratory was commendable. I noticed him working late after the class to finish his tasks and learning CNC codes for his project. His never-ending interest in machining processes and implementing CNC codes justify his passion for manufacturing and creative sectors. Furthermore, he is always ready to take up responsibilities apart from his curriculum and, he carries out his duties with immense dedication and sincerity.

I am sure that he possesses all the required traits for enrolment at your well-known University. Considering his interest in pursuing higher studies and his scholastic promise for his studies, I am certain of his ability to succeed as a student. If you have any further queries, please do not hesitate to contact me.

Sincerely,

Mr. S. Sundar

Assistant Professor (Senior Grade) / Mechanical Engineering  
College of Engineering & Technology, Kattankulathur
