

PROFESSIONAL SUMMARY

Data Analytics and BI professional with 4+ years of experience across insurance, retail, manufacturing, and 9 independent analytics projects spanning hospitality, property, HR, automotive, and financial domains. Core expertise spans data analysis, dimensional data modelling, ETL/ELT pipeline development, and dashboard design with hands-on experience in Snowflake, dbt, and Python-based analytics engineering. Holds an MSc in Data and Decision Analytics from the University of Southampton. Comfortable presenting complex insights to C-suite and non-technical stakeholders. Familiar with UK GDPR/DPA 2018.

TECHNICAL SKILLS

- Languages:** SQL (Advanced), Python, DAX, Power Query
 - BI & Visualisation:** Power BI, Qlik Sense/View, Tableau, Excel
 - ETL & Orchestration:** Qlik, dbt, Qlik QMC, Task Scheduler
 - Databases/Cloud:** Snowflake, Azure, MySQL, PostgreSQL
 - ML Tools:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
 - Certificates:** Databricks, dbt, Power BI, Tableau
- Other:** Git, CI/CD, Agile/Scrum, Documentation, BRDs
 - Data Modelling:** Dimensional Modelling, Fact & Dimension Design, snowflake and star schema (Kimball star schema)
 - Soft Skills:** Stakeholder Communication, Analytical Thinking, Problem-Solving

PROFESSIONAL EXPERIENCE

Sales Assistant & BI Volunteer

Apr 2024 – Present

Poundland & Dealz, Southampton, UK

Note: Joined as a cashier while completing my MSc. Approached the Area Manager to volunteer analytical support, leading to ownership of operational BI reporting across the South East region alongside cashier duties.

- Built** a loss-prevention dashboard tracking shrinkage by category, time of day, and department, giving store and area management a ranked view of avoidable losses to prioritise intervention, directly supporting decisions on security deployment and stock handling.
- Produced** area-wide MI packs consolidating like-for-like sales, labour cost %, and stock availability across the South East region, alongside store-facing report guides and field definitions to help non-technical staff interpret KPIs independently.
- Delivered** weekly SKU-level performance reports analysing units per transaction, basket behaviour, and category trends, enabling store managers to identify underperforming lines and inform ranging and shelf allocation decisions.
- Flagged** data quality issues to the IT team, documenting the discrepancy and expected outcome, and validated fixes through UAT before pushing updates to production reports.

Business Intelligence & Analytics Engineer

Sep 2021 – Aug 2023

Team Computers Pvt Ltd, India

- Designed** end-to-end analytics solutions using SQL, Python, dbt, Qlik, and Snowflake, transforming raw data into insights, KPIs, visualisations, and reports in Power BI and Qlik, with ML-based analysis where required.
- Developed** QlikSense and Power BI dashboards analysing customer behaviour across insurance products, helping reduce claim resolution time by 20% and improve customer retention by 15%.
- Delivered** automated, cross-departmental insight dashboards that helped reduce daily pending claims from 80K to 38K (52% improvement), enhancing customer experience and operational efficiency.
- Identified** key non-renewal drivers and **translated** complex datasets into clear, visual dashboards for non-technical stakeholders, enabling reminder automation and loyalty strategies that improved renewals by 20% and accelerated decision-making across business teams.
- Standardised** BI data models by redesigning Snowflake schema to Kimball style star schemas by optimising SQL, DAX, and Qlik ETL/ELT logic, reducing dashboard refresh time from 8 to 5 hours while improving data reliability and performance.
- Created** cross-departmental dashboards for MD, supported daily leadership decisions with real-time KPIs.
- Managed** parallel Sales, Claims, and Finance reporting initiatives, built automated ETL and Power BI models, streamlining reporting and accelerating stakeholder insights under tight deadlines.
- Deployed** a Sales Incentive Power BI Dashboard with correct metrics for payroll and performance, ensuring error-free payouts for sales staff and supporting a double-digit sales uplift within 6 months.
- Transformed** raw transactional data into **business-ready fact tables** and conformed **dimension tables**, enabling consistent KPIs and cross-functional reporting, resulting in cutting ad hoc reporting by 25%.
- Designed** CRM dashboards to track NPS and service KPIs, enabling targeted improvements and higher satisfaction.
- Migrated** 100+ reports from Excel to Power BI/Qlik, **automating** delivery via Python, Qlik NPrinting, and QMC - reducing manual effort by 70% and ensuring PHI-free outputs aligned with IRDAI compliance requirements.
- Developed** Python predictive models to flag high-risk claims, enhancing fraud detection and underwriting precision.
- Built** reusable SQL views and Python scripts for data extraction and analysis, requiring only minor amendments to apply across different reporting use cases, reducing build time for new reports.
- Mentored** junior analysts and interns in SQL query optimisation, DAX measure development, and Qlik dashboard design, producing structured reference guides and conducting hands-on walkthroughs to accelerate their onboarding and technical capability.
- Revamped** a low-adoption report by improving performance, simplifying visuals, and aligning KPIs with business needs, increasing daily usage and decision-making efficiency.

Data Analyst

Aug 2020 – Aug 2021

Nipa International, India

- Streamlined** ERP reporting by building a batch-based Python-MySQL data pipeline to automate extraction, cleaning, and visualisation preparation, reducing processing time by 20%.
- Replaced** manual Excel reports with user-friendly dashboards and workshops, driving faster insights and widespread business adoption.
- Supported** the preparation of reporting datasets by structuring transactional data into **fact and dimension tables** for operational KPI analysis.
- Automated** Excel and SQL reports to track production KPIs, efficiency, downtime, and defects, for faster performance monitoring.
- Uncovered** ₹25L (£24K) in potential annual savings through material waste analysis.

EDUCATION

University of Southampton, UK

Sep 2023 – Sep 2024

MSc Data and Decision Analytics (Merit) – School of Mathematical Sciences

SRM Institute of Science and Technology, India

Jul 2016 – Aug 2020

BTech in Mechanical Engineering (Merit)
