

VYOM KHANNA Data Analyst Analytics Engineer BI Analyst & Developer London, UK (willing to relocate) +447733989297 Mail LinkedIn Portfolio Projects	
PROFESSIONAL SUMMARY	
BI Developer and Analytics Engineer with 4+ years of experience delivering end-to-end analytics solutions across financial services, social housing, sports media, hospitality, and automotive sectors. Specialises in Power BI, Snowflake SQL, and Kimball-modelled data pipelines, with a track record of surfacing commercial insight from complex datasets and translating findings into stakeholder-ready reporting. MSc in Data and Decision Analytics, University of Southampton. All analytical outputs delivered in compliance with UK GDPR and DPA 2018.	
TECHNICAL SKILLS	
Languages: SQL (Advanced), Python, DAX, Power Query BI & Visualisation: Power BI, Qlik Sense/View, Tableau, Excel, Looker ETL & Orchestration: Qlik, dbt, Qlik QMC, Task Scheduler Databases/Cloud: Snowflake, Azure, MySQL, PostgreSQL ML Tools: Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn Certificates: Databricks, dbt, Power BI, Tableau, Looker Data Modelling: Dimensional Modelling, Fact & Dimension Design, Snowflake and star schema (Kimball star schema) Other: Git, CI/CD, Agile/Scrum, BRDs	
PROFESSIONAL EXPERIENCE	
Data Analyst (Contract) SpotlightSports Group, London, UK Built semantic layers in Snowflake using reusable SQL views to encapsulate subscriber, churn, and revenue logic, enabling multiple Looker Studio reports to consume consistent metrics without duplicating transformation logic. Led the migration of article performance scorecard views from web to app, tracking progress across multiple content verticals and reporting status to stakeholders. May 2026 – Present	
BI Developer (Contract) GreensquareAccords, Birmingham, UK Designed a two-page Power BI asset and repairs dashboard across 24,000 properties and 15,000 repair jobs, built on a Kimball star schema with a Repairs fact table, Properties dimension, and continuous DateTable, with Power Query transformations for postcode district extraction, EPC sort ordering, and duration bracketing. Surfaced £52K in potential annual contractor savings and identified 7,600 EPC D-or-below properties as the primary Decent Homes 2 compliance risk, with DAX measures covering total spend, average cost per job, emergency job rate, repeat repairs, and ageing stock analysis across Birmingham postcodes, structured to feed directly into Tenant Satisfaction Measure reporting. Jan 2026 – Mar 2026	
Analytics Engineer (Contract) Avis Budget Finance Berkeley, UK Built a machine learning demand forecasting model for car allocation across airport locations, engineering features from weather conditions, vehicle type, and location data, and evaluating multiple algorithms including Linear Regression, Random Forest, and XGBoost to identify the strongest predictor of demand patterns. Delivered fleet distribution recommendations based on model outputs, identifying key demand drivers by location and vehicle type to reduce misallocation risk and support more informed operational planning decisions. Oct 2025 – Dec 2025	
Market Insight Analyst (Contract) Oodle Finance, Manchester, UK Identified urban applicants as 65% more likely to fund than rural (38.7% vs 23.5%), ages 36–65 as representing 78% of all funded loans, and the Urban 51–65 Convertible segment as the highest-value cohort at 50.4% funded rate - 19.7 points above average - delivering a targeted marketing investment recommendation to the commercial team. Audited and redesigned low-adoption Power BI dashboards, resolving SQL performance issues, rebuilding the visual layer, and adding missing KPIs for daily stakeholder monitoring. Jul 2025 – Oct 2025	
Insight Analyst (Contract) Frasers Hospitality, London, UK Delivered OTB vs forecast revenue dashboard across cities, identifying a 28.84% revenue gap driven entirely by volume shortfall and surfacing day-of-week variance indicating a corporate demand profile. Optimised an underperforming Power BI dashboard by migrating calculated columns upstream into SQL, reducing report load time from 5 minutes to 30 seconds and enabling daily use by operational stakeholders. Mar 2025 – Jun 2025	
Business Intelligence Developer Team Computers Pvt Ltd (Client: Care Health Insurance), India Led end-to-end delivery lifecycle across BI projects - gathering stakeholder requirements, defining metric logic, documenting data dictionaries covering KPI definitions, DAX calculations, source tables, and data grain, and managing UAT sign-off via Excel and Jira-based feedback trackers before deployment. Designed end-to-end analytics solutions using SQL, Python, dbt, Power BI, and Snowflake, transforming raw data into insights, KPIs, visualisations, and reports in Power BI and Qlik, with ML-based analysis where required. Delivered automated, cross-departmental insight dashboards that helped reduce daily pending claims from 80K to 38K (52% improvement), enhancing customer experience and operational efficiency. Standardised BI data models by redesigning Snowflake schema to Kimball star schemas and optimising SQL, DAX, and Qlik ETL/ELT logic; further reduced processing time from 8 hours to 5 hours by migrating calculated columns upstream, centralising measures into a dedicated table, and simplifying DAX logic across multiple dashboards. Delivered an integrated CRM dashboard surfacing NPS, churn patterns, and renewal trends that identified that 70% of non-renewals stemmed from premium hikes and poor reminders, directly informing automated renewal communications that contributed to a 15-20% retention uplift within three months. Concurrently delivered three high-priority BI initiatives - Sales Executive Report, Claims Automation, and Commission Optimisation - building reusable ETL pipelines and data models that reduced build time across all three and delivered on time and recognised for stakeholder coordination under pressure. Built a four-module executive reporting system for the MD across Claims, Finance, Sales, and Actuarial, integrating real-time KPIs via semantic layers and centralising DAX measures in Power BI as a standard reference for MD reviews, forecasting, and strategic planning organisation-wide. Deployed a Sales Incentive Power BI Dashboard with correct metrics for payroll and performance, ensuring error-free payouts for sales staff and supporting a double-digit sales uplift within 6 months. Transformed raw transactional data into business-ready fact tables and conformed dimension tables, enabling consistent KPIs and cross-functional reporting, resulting in cutting ad hoc reporting by 25%. Developed QlikSense and Power BI dashboards analysing customer behaviour across insurance products, helping reduce claim resolution time by 20% and improve customer retention by 15%. Migrated 100+ reports from Excel to Power BI/Qlik, automating delivery via Python, Qlik NPrinting, and QMC - reducing manual effort by 70% and ensuring PHI-free outputs aligned with IRDAI compliance requirements. Developed Python predictive models to flag high-risk claims, enhancing fraud detection and underwriting precision. Mentored junior analysts and interns in SQL query optimisation, DAX measure development, and Qlik dashboard design, producing structured reference guides and conducting hands-on walkthroughs to accelerate their onboarding and technical capability. Sep 2021 – Aug 2023	
Data Analyst Nipa International, India Streamlined ERP reporting by building a batch-based Python-MySQL data pipeline to automate extraction, cleaning, & visualisation preparation, reducing processing time by 20%. Supported the preparation of reporting datasets by structuring transactional data into fact and dimension tables for operational KPI analysis. Automated Excel and SQL reports to track production KPIs, efficiency, downtime, and defects, for faster performance monitoring. Uncovered ₹25L (£24K) in potential annual savings through material waste analysis. Aug 2020 – Aug 2021	
EDUCATION	
University of Southampton, UK MSc Data and Decision Analytics (Merit) – School of Mathematical Sciences Sep 2023 – Sep 2024	
SRM Institute of Science and Technology, India BTech in Mechanical Engineering (Merit) Jul 2016 – Aug 2020
