

VYOM KHANNA

BI Developer | Data Analyst | Analytics Engineer

London, UK (willing to relocate) | +447733989297 | vyomkhanna355@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Projects](#)

PROFESSIONAL SUMMARY

BI Developer & Analytics Engineer with 4+ years of experience delivering end-to-end analytics solutions across multiple sectors seeking a purpose-driven role. Core expertise spans data analysis, BI engineering, dimensional data modelling, & ETL/ELT pipeline development, & surfacing insights from complex datasets & translating findings to stakeholders and business holders in action-driven reports & dashboards in compliance with UK GDPR, DPA 2018, & FCA. Hold MSc in Data & Decision Analytics from the University of Southampton.

TECHNICAL SKILLS

- Languages:** SQL (Advanced), Python, DAX, Power Query
 - BI & Visualisation:** Power BI, Qlik Sense/View, Tableau, Excel, Looker
 - ETL & Orchestration:** Qlik, dbt, Qlik QMC, Task Scheduler
 - Databases/Cloud:** Snowflake, Azure, MySQL, PostgreSQL
 - ML Tools:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn
- Certificates:** Databricks, dbt, Power BI, Tableau, Looker
 - Data Modelling:** Dimensional Modelling, Fact & Dimension Design, Snowflake & star schema (Kimball star schema)
 - Other:** Git, CI/CD, Agile/Scrum, BRDs
 - Emerging Technology:** Claude, CoPilot

PROFESSIONAL EXPERIENCE

<i>Data Analyst (Contract)</i>	<i>May 2026 – Present</i>
Spotlight Sports Group, London, UK Built reusable Snowflake SQL views as a semantic layer consolidating subscriber, churn, & revenue metrics, delivering a Looker Studio subscription performance dashboard as the leadership team's single source of truth - designed for executive consumption without requiring technical interpretation. Developed app-based article performance scorecard views across multiple content verticals, tracking delivery progress & reporting status updates to stakeholders. Maintained a shared tracker for delivery visibility across metric definition & sign-off workstreams, covering dependencies & stakeholder milestones, proactively surfacing blockers & reporting status updates to keep delivery on schedule.	
<i>BI Developer (Contract)</i>	<i>Jan 2026 – Mar 2026</i>
GreensquareAccord, Birmingham, UK Designed a Power BI dashboard across 24,000 properties & 15,000 repair jobs, built on a Kimball star schema & centralised DAX Table with postcode-level & EPC-based transformations for compliance & cost analysis. Surfaced £52K in potential annual contractor savings & flagged 7,600 EPC D-or-below properties as the primary Decent Homes 2 compliance risk, feeding directly into Tenant Satisfaction Measure reporting. Established a data dictionary covering KPI definitions, DAX calculations, source tables, data grain, and known limitations for every metric in the reporting suite, serving as the single reference for cross-departmental disputes and compliance audits	
<i>Analytics Engineer (Contract)</i>	<i>Oct 2025 – Dec 2025</i>
Avis Budget Finance, Bracknell, UK Built a machine learning demand forecasting model for car allocation across airport locations, engineering features from weather conditions, vehicle type, & location data, & evaluating multiple algorithms including Linear Regression, Random Forest, & XGBoost to identify the strongest predictor of demand patterns. Delivered fleet distribution recommendations based on model outputs, identifying key demand drivers by location & vehicle type to reduce misallocation risk & support more informed operational planning decisions.	
<i>Market Insight Analyst (Contract)</i>	<i>Jul 2025 – Oct 2025</i>
Oodle Car Finance, Manchester, UK Reframed a rural-urban funding gap as an outreach opportunity rather than a value judgement, & flagged a data anomaly before it could bias targeting, supporting inclusive, evidence-based investment decisions. Audited & redesigned low-adoption Power BI dashboards, resolving SQL performance issues, rebuilding the visual layer, & adding missing KPIs for daily stakeholder monitoring. Implemented Python data validation scripts covering row counts, null checks, & anomaly detection at each stage of the analysis pipeline, flagging structural nulls, source system fallback values, & outlier deposit-to-loan ratios before analysis - ensuring findings were built on a clean, defensible dataset.	
<i>Insight Analyst (Contract)</i>	<i>Mar 2025 – Jun 2025</i>
Frasers Hospitality, London, UK Delivered OTB vs forecast revenue dashboard across cities, identifying a 28.84% revenue gap driven entirely by volume shortfall & surfacing day-of-week variance indicating a corporate demand profile. Documented end-to-end ETL lineage across all pipelines - mapping data flow from source systems through staging, transformation, & presentation layers - enabling faster debugging, audit-readiness, & transparent handover to incoming developers. Optimised an underperforming Power BI dashboard by migrating calculated columns upstream into SQL, reducing report load time from 5 minutes to 30 seconds & enabling daily use by operational stakeholders.	
<i>Sales Assistant</i>	<i>Apr 2024 – Jul 2026</i>
Poundland & Dealz <i>Note: Alongside my Sales Assistant role, I undertook a 3-month (Nov 2024 – Feb 2025) internal data project for Poundland, during which the below analytics work was delivered.</i> Built a loss-prevention dashboard tracking shrinkage by category, time of day, & department, giving store & area management a ranked view of avoidable losses to prioritise intervention, directly supporting decisions on security deployment & stock handling. Produced area-wide MI packs consolidating like-for-like sales, labour cost %, & stock availability across the South East region, alongside store-facing report guides & field definitions to help non-technical staff interpret KPIs independently. Delivered weekly SKU-level performance reports analysing units per transaction, basket behaviour, & category trends, enabling store managers to identify underperforming lines & inform ranging & shelf allocation decisions.	
<i>Business Intelligence Developer</i>	<i>Sep 2021 – Aug 2023</i>
Team Computers Pvt Ltd (Client: Care Health Insurance), India Led end-to-end delivery lifecycle across BI projects - gathering stakeholder requirements, defining metric logic, documenting data dictionaries covering KPI definitions, DAX calculations, source tables, & data grain, & managing UAT sign-off via Excel & Jira-based feedback trackers before deployment. Designed end-to-end analytics solutions using SQL, Python, dbt, Power BI, & Snowflake, transforming raw data into insights, KPIs, visualisations, & reports in Power BI & Qlik, with ML-based analysis where required. Delivered automated, cross-departmental insight dashboards that helped reduce daily pending claims from 80K to 38K (52% improvement), enhancing customer experience & operational efficiency. Standardised BI data models by redesigning Snowflake schema to Kimball star schemas & optimising SQL, DAX, & Qlik ETL/ELT logic; further reduced processing time from 8 hours to 5 hours by migrating calculated columns upstream, centralising measures into a dedicated table, & simplifying DAX logic across multiple dashboards. Delivered an integrated CRM dashboard surfacing NPS, churn patterns, & renewal trends that identified that 70% of non-renewals stemmed from premium hikes & poor reminders, directly informing automated renewal communications that contributed to a 15-20% retention uplift within three months. Maintained a centralised Excel-based project tracker shared with business stakeholders as a single source of truth for BI delivery progress, milestone sign-off, & UAT status across concurrent initiatives. Concurrently delivered three high-priority BI initiatives - Sales Executive Report, Claims Automation, & Commission Optimisation - building reusable ETL pipelines & data models that reduced build time across all three & delivered on time, & recognised for stakeholder coordination under pressure. Built a four-module executive reporting system for the MD across Claims, Finance, Sales, & Actuarial, integrating real-time KPIs via semantic layers & centralising DAX measures in Power BI as a standard reference for MD reviews, forecasting, & strategic planning organisation-wide. Deployed a Sales Incentive Power BI Dashboard with correct metrics for payroll & performance, ensuring error-free payouts for sales staff & supporting a double-digit sales uplift within 6 months. Transformed raw transactional data into business-ready fact tables & conformed dimension tables, enabling consistent KPIs & cross-functional reporting, resulting in cutting ad hoc reporting by 25%. Developed QlikSense & Power BI dashboards analysing customer behaviour across insurance products, helping reduce claim resolution time by 20% & improve customer retention by 15%. Migrated 100+ reports from Excel to Power BI/Qlik, automating delivery via Python, Qlik NPrinting, & QMC - reducing manual effort by 70% & ensuring PHI-free outputs aligned with IRDAI compliance requirements. Developed Python predictive models to flag high-risk claims, enhancing fraud detection & underwriting precision.	

- **Mentored** both non-technical business users through Power BI adoption and junior analysts in SQL, DAX, and Qlik - producing plain-language user guides, structured reference guides, and conducting hands-on walkthroughs to build capability across technical and non-technical audiences.

<i>Data Analyst</i>	<i>Aug 2020 – Aug 2021</i>
Nipa International, India	
• Streamlined ERP reporting by building a batch-based Python-MySQL data pipeline to automate extraction, cleaning, & visualisation preparation, reducing processing time by 20%. • Supported the preparation of reporting datasets by structuring transactional data into fact & dimension tables for operational KPI analysis. • Automated Excel & SQL reports to track production KPIs, efficiency, downtime, & defects, for faster performance monitoring. • Uncovered ₹25L (£24K) in potential annual savings through material waste analysis.	

EDUCATION

University of Southampton, UK	<i>Sep 2023 – Sep 2024</i>
MSc Data & Decision Analytics (Merit) – School of Mathematical Sciences	
SRM Institute of Science & Technology, India	<i>Jul 2016 – Aug 2020</i>
BTech in Mechanical Engineering (Merit)
